

EverGreen® ULV 5-25

INSECTICIDE

SPACE SPRAY - AIR

EverGreen® ULV 5-25 AIR

Effective Aerial Performance

Fast-Acting Mosquito Control

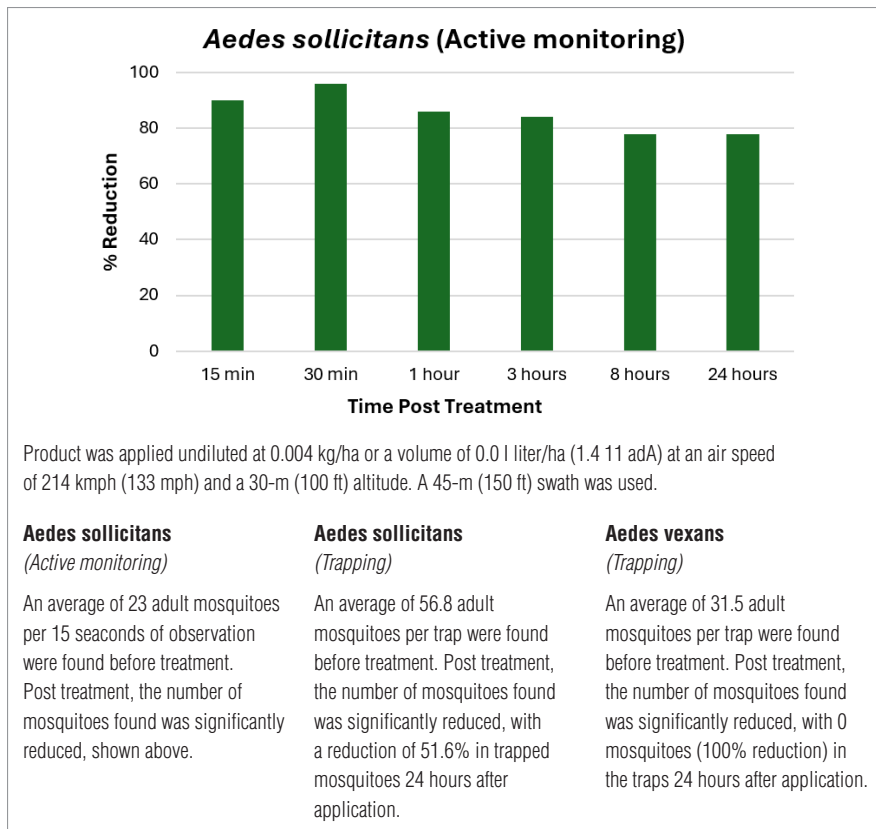

EverGreen® ULV 5-25 Air is a contact insecticide designed for aerial ULV applications. Formulated with botanically based pyrethrins (Group 3A) and synergized with piperonyl butoxide (PBO) to flush mosquitoes from harborage areas and maximize contact for a faster, more complete kill.

Features and Benefits

- Intended for use by mosquito abatement agencies
- May be applied undiluted or diluted with a suitable oil
- Formulated with a higher density solvent for improved drift control and aerial targeting
- Includes more active ingredient per gallon for lower effective use rates, allowing for more treated acres per gallon
- Synergized to combat metabolic resistance and maximize effectiveness
- Labeled for use in residential, industrial, recreational, agricultural and other areas where adult mosquitoes occur

Packaging

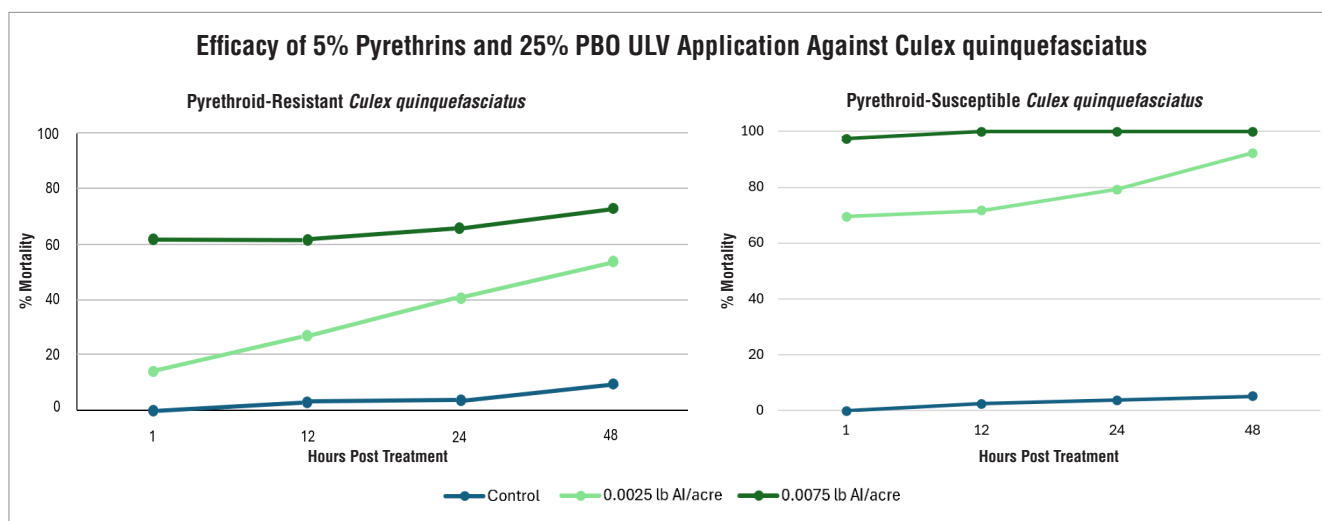

- 55 gallon drum
- 275 gallon tote
